

Let's go shopping!

**Get a variety of everyday objects, such as tins of food, and lay them out on a table.
Then label each object with a price up to 5p.**

**Then give your child 10p
to spend at the 'shop'.**

Depending on your child's ability, you could give
ten **1p** coins, or a **5p** coin
and five **1p** coins or a **5p**, **2p** and three **1p** etc...

***Your child needs to work out what they can buy with their
10p. When they buy their first item, give them their change
and then let them work out what they can buy next.***
