Forever Without End

When the sun begins to shine
Keep your face turned toward the light
And the shadows when they fall
Larger than all.

As you walk along this road
To a place that's yet unknown
You can take my heart along
To make you strong.

Take my hand and you will be
Take my hand and you will be
Always safe here with me
Always safe here with me.
I will be your friend for ever--------
And ever--------
And ever--------
And ever--------
And ever--------
Ever without end.

Should the days lead us apart
Remember in your heart
How I see your face so bright
Turned toward the light.

(optional wordless solo)

Take my hand and you will be
Take my hand and you will be
Always safe here with me
Always safe here with me.
I will be your friend for ever--------
And ever--------
And ever--------
And ever--------
And ever--------
Ever without end.

Repeat chorus
